Anatomy of a Case: Lexis+

The **Citing Decisions** tab lists all the cases that cite the case.

Other Citing Sources lists all the non-case sources that cite the case.

The **Table of Authorities** is a list of all the sources cited in the case.

The **Shepard's Report** tells researchers how the case was treated by subsequent cases.

The **History** tab shows researchers the prior and subsequent history of a case.

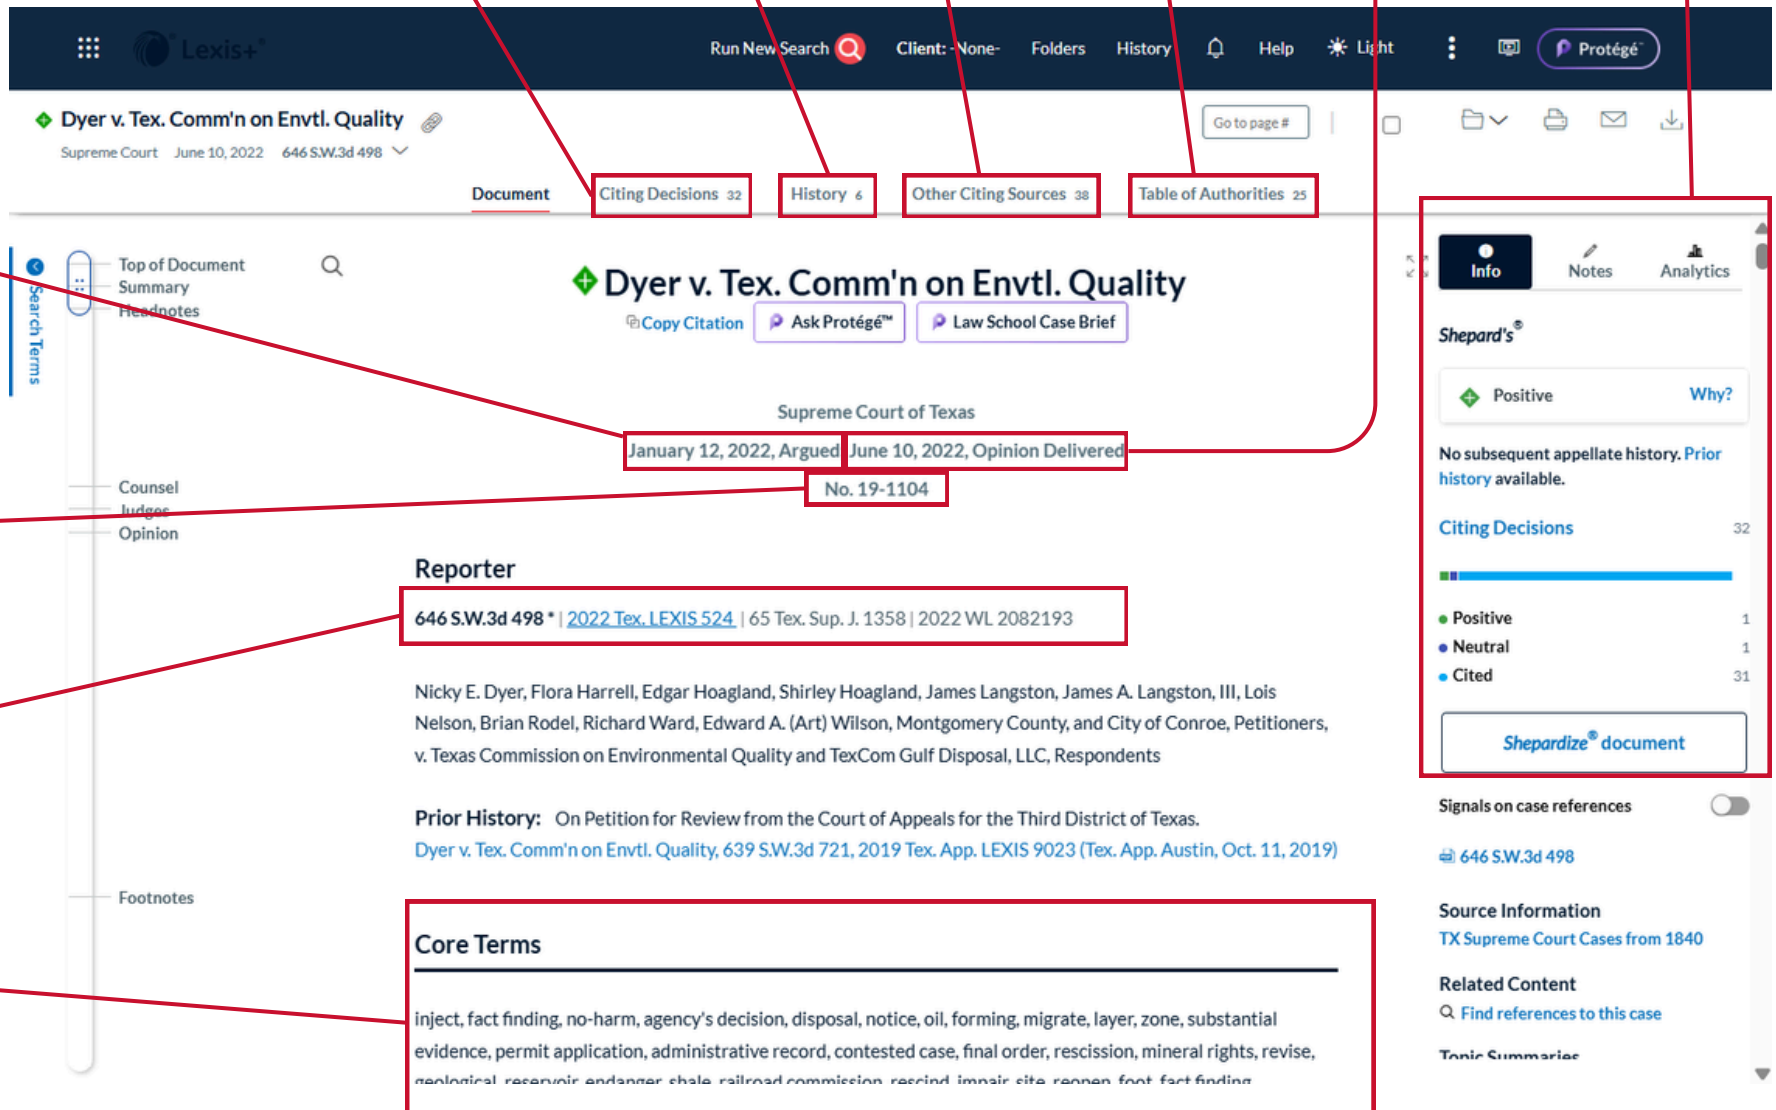

The **Opinion Date** is the date the opinion was delivered or published.

The **Argued Date** is the date oral arguments were heard before the court.

A Docket Number is an independent number assigned to each case when it's filed; this number attaches to all filings and court documents while the case is before the court.

The **Case Citation** tells researchers how to look up the case or find it in a print reporter. Here it's 646 S.W.3d 498, which stands for page 498 of the 646th volume of the Southwestern Reporter Third.

The **Core Terms** lists important terminology used in the case.

Anatomy of a Case: Lexis+

The case **Summary** provides a brief summary of the facts, the nature of the claim, the procedural stages in the history of the case, and the decision by the court.

Headnotes give summaries of sub-issues discussed in a case. Researchers can use headnotes to find where that issue was discussed in the case and to find more cases on that issue.
